Art Unit: 1647

1. Applicant's preliminary amendment canceling claims 1-25 and adding new claims 26-53, filed on 22 January 2002, is acknowledged. Thus claims 26-53 are pending and under consideration.

2. This application is a 371 of PCT/IL00/00427. For applications filed under 371, PCT rules for lack of unity apply.

3. This application contains inventions or groups of inventions which are not so linked as to form a single inventive concept. Under PCT Rule 13.1 the following combinations of claims of different categories are permissible and restriction to one of the following combinations is required:

- I. Claims 26-27, 30, 32-35, 38-40 and 42-48, drawn to an isolated nucleic acid molecule, an expression vector, a host cell, a pharmaceutical composition comprising said nucleic acid and a method of using said nucleic acid.
- II. Claims 28-29, 36-37, drawn to an isolated polypeptide and a pharmaceutical composition comprising said polypeptide.
- III. Claims 31 and 41, drawn to an isolated antibody and a method of using said antibody.
- IV. Claims 49-53, drawn to a method of identifying a binding partner or for a polypeptide.

Pursuant to 37 C.F.R. 1.475(d), this Authority considers that the main invention in the instant application comprises the first-recited product, namely an isolated nucleic acid molecule, an expression vector, a host cell, and the first recited method, namely, a

Art Unit: 1647

method for detecting the presence of at least one variant by using said nucleic acid.

Note that there is no method of making the nucleic acid. Further, pursuant to 37 C.F.R. 1.475(b)-(d), the ISA/US considers that the materially and functionally dissimilar products of groups II -III and the additional method of group IV do not correspond to the main invention. This Authority therefore considers that the several inventions do not share a special technical feature within the meaning of PCT Rule 13.2 and thus do not relate to a single general inventive concept within the meaning of PCT Rule 13.1.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
